ABOUT THE COMPANY

General Ceramics is a competitive reality in the local, regional and international sanitary ware markets and remains the reliable partner for the supply of quality products for government, commercial and residential projects in the local and export markets.

Vision

To maintain its status as the most reputed and successful company in the Gulf region, offering the best products and customer care services in the ceramic industry.

Mission Statement

Through constant innovation, quality control, and keeping pace with the newest technology, these have enabled General Ceramics to fulfill its mission statement – “To provide high quality competitively priced sanitary ware & acrylic, which meets and surpasses the needs of the customers.”

Front view of General Ceramics at Sharjah.

COMPANY PROFILE

GENERAL CERAMICS, A PIONEER MANUFACTURER IN THE GULF REGION, WAS ESTABLISHED IN 1978 AND CEREMONIALLY INAUGURATED BY HIS HIGHNESS SHEIKH SULTAN BIN MOHAMED AL QASIMI, WITH THE AIM OF SERVING THE LOCAL INDUSTRY IN RESPONSE TO THE GROWING DEMAND FOR QUALITY SANITARY WARE & ACRYLIC TO SUPPLY THE BURGEONING AND INCREASINGLY DISCERNING CONSTRUCTION INDUSTRY.

The first bathroom suite produced by General Ceramics was “Al Nisr”, an evergreen model which is still popular today.

Since these humble beginning, General Ceramics has designed a wide variety of products and models for its product catalogue – a comfortable selection of Ceramic bathroom suites, Special Needs Suites, Child Care Suites, Counter Wash Basins, Wall Mounted Wash Basins, Fire Clay Sinks & Shower Trays, Accessories and Acrylic Bath Tubs and Shower Trays. This versatile product range allows our customers to create their own exclusive harmonizing bathroom environment.

Today General Ceramics is a competitive reality in the local, regional and international sanitary ware markets and remains the reliable partner for the supply of quality products for government, commercial and residential projects in the local and export markets.

The name General Ceramics has become synonymous with its quality and craftsmanship which ensures that every unit is worthy of General Ceramic’s quality seal of approval.

General Ceramics products conform to BS 3402 for Vitreous China, BS 1206 for Fire Clay and BS 4305 for Acrylic and the company operates under an ISO 9001: 2015 Quality Management System.

CERTIFICATIONS

Quality Standard ISO 9001: 2015

General Ceramics, has been certified to comply with ISO 9001 : 2015 Quality Management System standards.

Standard Specifications

The important technical aspects of sanitary ware products are covered in the most highly rated standards such as the British Standard (BS), European Standard (EN), and the Deutsche Institute Fur Normative (DIN) specifications. These specifications have been in existence for many years and have occasionally being upgraded to take account of new products or important additional requirements. However the basic requirements and needs of sanitary ware remains the same.

Sanitary ware is basically an engineered piece of Vitreous China designed for safe, clean and efficient hygienic and ablution purposes. As such:

- It must conform to dimensional performance and design tolerances.
- It must be properly vitreous through the unglazed body of the piece.
- It must be properly coated with a fused vitreous glazed surface.
- The glazed surface must be resistance to chemical attacks by acids and alkalis, stain proof, burn proof , rust proof, non fading and durable.

The technical aspects of a sanitary ware piece, which is crucial to its quality are generally specified as follows:

1. Test for water absorption.
2. Test for Crazing.
3. Tests for chemical resistance.
4. Tests for resistance to staining and burning.

Product Specifications

The company name, General Ceramics and the product names listed in the catalogue are trade mark of General Ceramics, United Arab Emirates.

The products of General Ceramics are sold under the brand name General Ceramics and customized brand names (N&C, Carron Phoenix, Niclasen, e.t.c) for Export OEM customers. General Ceramics products are exported to over 10 different countries around the world General Ceramics always pursue a policy of continuing improvement in design and performance of its products. The right is therefore reserved to vary specifications and colour range without notice.

General Ceramics Product Quality

All ceramic & Acrylic products delivered by General Ceramics is produced of Vitreous China, Fire Clay & Acrylic materials respectively. General Ceramics sanitary ware made of vitreous china conform to BS 3402 and are manufactured according to the European specifications, as described in the relevant standards - EN31, EN32, EN35, EN36, EN14528, EN33, EN34, EN37, EN38, when applied in line with directive EN 997.

General Ceramics shall at the request of the purchaser, provides a certificate to the effect that the General Ceramics sanitary ware made are capable of passing the following tests:

1. Water absorption capacity < 0.5%
2. Firing temperature of 1200 to 1220 degrees centigrade.
3. Acid, base, hot water, stain impact, abrasion, thermal shock resistance.
4. Resistance to crazing.
5. Resistance to bending (500 kg/cm2)

General Ceramics Fire Clay ware conforms to BS 1206.

General Ceramics Acrylic products conform to BS 4305 are capable of passing the following tests:

1. Softening Point
2. Surface Hardness
3. Thermal Stability
4. Tensile Strength
5. Resistance to Chemicals & Stains
6. Colour Fastness

Our range of quality products, quality systems, and long experience and know-how is the guarantee of receiving our products at the quality which you expect.

General Ceramics Product Durability Guarantee

Although a direct relation between performing quality tests and consumer product life does not exist up to now, the experience (all around the world) certifies that a product that respectably conforms to BS 3402 or BS 4305 will have consumer product life for a minimum of 10 years.

This guarantee is not covered against mishandling during transportation or installation. Ceramic products are not covered against impact test. Acrylic products have a limited impact resistance stated by the standards. Maintenance precaution for our acrylic products are stated in the attached label (should be removed by the end user/final consumer) and be observed by the housekeeper.

Pre-requisites of Guarantee

General Ceramics sanitary ware and acrylic products are guaranteed as durable and reliable quality products that has been designed and manufactured to the highest possible standards to give the consumer years of trouble free service, provided the products are installed by a qualified plumber and correctly used in accordance with the instructions.

Free replacement or repair provided by our technical supports' discretion of any components manufactured by General Ceramics, which are proven to be defective in materials or workmanship on post installation.

- Guarantee applies in the UAE and export markets.
- The product shall be subjected only for normal domestic use.
- The guarantee covers the vitreous China wares.
- Proof of purchase must be retained by the customer.

RAW MATERIALS

GENERAL CERAMICS FOCUSES ON THE FACT THAT QUALITY BEGINS FROM THE RAW MATERIAL STAGE ITSELF. THE MAJOR RAW MATERIALS FOR BODY NAMELY BALL CLAY AND KAOLIN ARE IMPORTED FROM UK AND ALMOST ALL GLAZE MATERIALS ARE IMPORTED FROM REPUTED COMPANIES IN UK AND EUROPE, WHICH ARE FIRED TO 1200 DEGREES CENTIGRADE TO ENSURE PROPER VITRIFICATION OF THE MATERIALS.

All raw materials received, are tested by the laboratory according to the in plant quality control and quality maintenance system and the entire test results are compared with General Ceramics standard parameters. Materials are accepted if the test results are within General Ceramics standard parameters and rejected if not.

VITREOUS CHINA

The Vitreous China Sanitary ware products are manufactured using high quality Ball Clay, Kaolin, Silica, Feldspar etc. The off white body of Vitreous China is generally covered with an opacified glaze, which is the General Ceramics standard white or a range of specified colours.

The Plastic and Non Plastic Raw Materials are added to the high speed blunger as per the recipe and blunged in the high speed Blunger for 2 hours to produce the Body Slip. The Body Slip is then passed through a vibrating sieve attached to a fine mesh with powerful magnets to remove impurities before being finally stored in the Storage Arc. From the Storage Arc, the Body Slip is transferred to various casting departments after testing the rheological properties.

The Sanitary ware products are produced using three different types of casting processes namely battery casting, beam casting and traditional casting.

The casted products are then arranged on trolleys to undergo a natural drying process of 24 to 48 hours depending on the size of the products. The products are then given a smooth finish before being sent for drying in Chamber dryers for another 10 – 12 hours in order to achieve moisture content below 1%.

The dried pieces are then transferred to Green ware inspection booths. During inspection, each and every piece will be checked for technical flaws before being transferred to Glaze Spraying Booths, where they are coated with an impervious, non-crazing vitreous glaze.

The glaze is a glassy vitreous material that gives an effect of super - cooled liquid which is cooled below the point of crystallizing. In general, the glaze is used in the ceramic industry to protect the surface of the body of the article from dirt, micro organisms, moisture suction, chemical reactions and also it exhibits attractive clear appearance to the human eye after firing the body over the surface of the article in appropriate firing conditions.

The glaze is a combination of Chemicals and Minerals milled in the Ball mills and processed through fine sieve and powerful magnets to remove impurities and tested as per the standard procedures before being sent to the spraying booth.

There are numerous quality checks during each and every stage in the body and glaze preparation.

The glazed pieces are then arranged on kiln cars before the pieces are transferred to the shuttle or tunnel kilns for firing at a very high temperature

of 1220 ° C to obtain Vitreous China Sanitary ware with Water Absorption less than 0.5% of the dry weight.

The resulting fired product then undergo different Quality checking / testing processes such as visual quality check, leak test, dimensional check, Crazing test, Burning test & Staining test, Acid resistance test, , Water Absorption test etc. as per the procedure.

Vitreous China is therefore highly Hygienic, Fireproof, Stain-proof, Rust proof, non-fading and is also resistant to Acids & Alkalies.

FINE FIRE CLAY

Fireclay Sanitary ware products are manufactured using Ball clays, Kaolin, Quartz and Pre-fired Clays (Chamotte). The clays are processed in the blunger and to this mix; Quartz and Pre-fired clay are added to undergo blunging process for an hour to achieve homogeneity. The final 'Fireclay Slip' is then passed through a mesh and powerful magnet to remove impurities before being stored in the storage Arc. The other manufacturing process remains same as of Vitreous China products.

In general, fireclay slip will be used to produce heavy-duty large size washbasins, shower trays, kitchen sinks, service sinks; lab sinks etc., where the shape retention is critical.

APPROVALS IN THE UAE GOVERNMENT DEPARTMENTS

Names of UAE Government Department where General Ceramics is approved and specified for their projects:

1. Director of Military Works
2. Public Works Dept. (PWD)
3. Khalifa Committee (Abu Dhabi)
4. Dubai Municipality
5. Dubai AWQAF
6. Dept. of Health and Medical Sciences (DOHMS)
7. Development Board Government of Dubai
8. Real Estate Dept. of Dubai
9. Sharjah Municipality
10. Sharjah PWD
11. University City, Sharjah
12. Ministry of Public Works
13. Shk. Zayed Housing Program
14. Sharjah Iskan
15. Dubai Police
16. Sheikh Mohammed Bin Rashed Housing Projects.

PRESTIGIOUS PROJECTS

List of some prestigious projects:

AIRPORTS

- Dubai International Airport New Departure Lounge
- Dubai International Airport Emirates Airlines Departure Lounge
- Sharjah International Airport
- DAFZA – Dubai International Airport Free Zone Authority
- JAFZA – Jebel Ali Free Zone Authority
- Saif Zone – Sharjah Airport Industrial Free Zone Authority
- EXPO Centre Sharjah

NAKHEEL PROJECTS

- International City – Package 7
- International City – Package 9
- Gardens – Residential Buildings

HOTELS

- Jumeirah Beach Hotel
- Radisson Sas Hotel
- Dubai World Trade Centre Apartments
- Crown Plaza Hotel - Dubai
- Sharjah Beach Hotel
- Lou' Lou' A Resorts - Sharjah
- Jebel Ali Hotel - Dubai

HOSPITALS

- Tawwam Hospital, Abu Dhabi
- Al Mafraq Hospital, Abu Dhabi
- Kuwaiti Hospital, Sharjah
- Rashid Hospital, Dubai
- Al Jazerah Hospital
- Al Ain Hospital
- Al Zahrah Hospital, Dubai, Sharjah
- New Medical Centre
